

Singlefact: DARIA – „Paranoia“

VÖ: 08.10.2021

A few months ago, the entire pop / dance scene was not familiar with the name Daria. But with her first publication, it was able to place herself at the top of the hit lists. With her debut single "Love Blind" she made it into the TOP 5 of the Polish airplay charts. A hit was born.

Daria lives on her dream, which is becoming more and more a reality. With the new single "Paranoia" she wants to continue her success story. A pop / dance track that relies on a powerful and energetic sound with a catchy melody. Daria's unmistakable voice and the catchy melodies complete this strong song, which fits perfectly into autumn. "Paranoia" is a song that makes you dance, but also makes you think.

With "Paranoia" Daria tells how unrequited love can drive you crazy. Reality becomes blurred and one can no longer think clearly. What has become of me

Baby

I don't know me no more lately

See the monster that you've made me

Maybe it's the pa pa paranoia

Can't you see I'm crazy for ya

Musically, she continues to trust the successful "Pelican" producer team that has meanwhile established itself on the European music market.
