

**Singlefact: Jona Selle & Hym – „Models“**

**VÖ: 19.03.2021**

With Jona Selle & Hym two very characteristic artists have joined forces for a new project who couldn't be more different. But that's probably what makes this project so special.

Jona Selle is an established singer-songwriter who has already looked for his way in various repertoire terrains, but finally found his goal in dance. Jona Selle was able to earn his first successes with TOPIC and the track "Light it up". As a result he co-wrote Topic's first album "Miles" and was there as a singer. Together with Topic and Nico Santos he wrote the top hit "Home".

His project partner Hym (Sedric Perry) is considered a dazzling figure in the scene. He comes from the USA and has also lived in Berlin for several years. Hym is the absolute counterpart to Jona and was more at home in R&B / Pop, but their voices fit together perfectly. So far he has worked successfully with artists such as Nicholas Haelg, Noize Generation or Freischwimmer.

With the track "Models" Jona Selle & Hym release their first joint song. "Models" was initially planned as a hip-hop track and developed into a completely new number in the studio. The result was a slap house / hip hop concept that with its triplet grooves gives the track a very special character. A new style that also finds its place in mainstream dance.

This project was produced by the innovative producer team "Pelican", which has already established itself on the market with productions for Alle Farben, Robin Schulz or Sarah Connor.
